PRODUCT INFORMATION

Clone ID	**Warning**: Undefined variable $hasAttributeValueDescription in **/www/wwwroot/tech.dimabio.cn/wp-content/plugins/woocommerce-print-products/public/class-woocommerce-print-products-public.php** on line **2806** 1A3
Target	CD14
Synonyms	CD14 Molecule;Myeloid Cell-Specific Leucine-Rich Glycoprotein;CD14 Antigen;Monocyte Differentiation Antigen CD14
Host Species	Rabbit
Description	Anti-CD14 antibody(1A3), IgG1 Chimeric mAb
Delivery	In Stock
Uniprot ID	P08571
IgG type	Rabbit/Human Fc chimeric IgG1
Clonality	Monoclonal
Reactivity	Human
Applications	Flow Cyt
Recommended Dilutions	Flow Cyt 1/100
Purification	Purified from cell culture supernatant by affinity chromatography
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage&Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	The protein encoded by this gene is a surface antigen that is preferentially expressed on monocytes/macrophages. It cooperates with other proteins to mediate the innate immune response to bacterial lipopolysaccharide, and to viruses. This gene has been identified as a target candidate in the treatment of SARS-CoV-2-infected patients to potentially lessen or inhibit a severe inflammatory response. Alternative splicing results in multiple transcript variants encoding the same protein. [provided by RefSeq, Aug 2020]
Usage	Research use only
Conjugate	Unconjugated

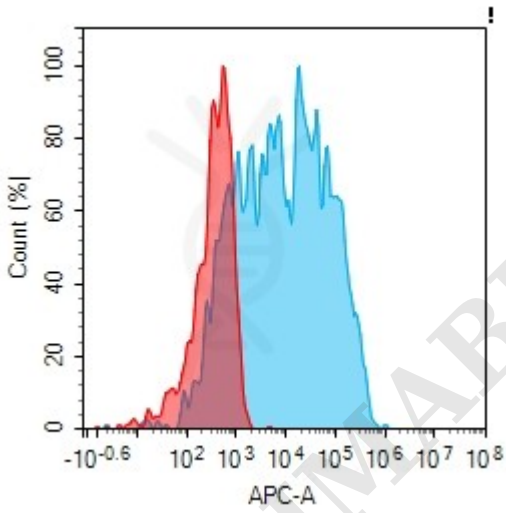

Figure 1. Flow cytometry analysis with 10μg/mL Anti-CD14 (1A3) mAb on HEK293 cells transfected with human CD14 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).
